PROFESSIONAL SUMMARY

Senior Full-Stack Web Developer with 9+ years building and shipping production web applications across CMS platforms, SaaS products, and enterprise integrations. Currently embedded with AWD Digital (Australia) as a long-term engineering partner, delivering solutions across WordPress/WooCommerce, Nuxt.js, Laravel, OctoberCMS, and Magento — from front-end theming to server administration on Linux/Azure/Plesk. Proven ability to architect scalable systems, lead small teams, and take projects from design to deployment.

WORK EXPERIENCE

Senior Full-Stack Web Developer · [Connect OS → AWD Digital \(AU\)](#)

October 2020 – Present

- Embedded long-term with AWD Digital (Australia) delivering tailored development solutions across a diverse client portfolio.
- Built and maintained client websites using WordPress/WooCommerce, OctoberCMS (Winter CMS), Magento, Nuxt.js, and Next.js.
- Developed a custom TeamTailor + Gravity Forms sync plugin for automated job listing and application submission workflows.
- Integrated Power BI embedded analytics using Azure App Registration (App Owns Data model, service principal) in a Next.js/Winter CMS architecture.
- Developed a WooCommerce CDN image sync cron job using HTTP HEAD timestamp comparison for efficient re-download on change.
- Administered Linux servers via Plesk on Azure: managed PHP-FPM config, MySQL/InnoDB optimisation, Node.js version management, ModSecurity WAF tuning, and SSL/DNS for multi-domain environments.
- Worked on Xero API integration (invoice sync, email delivery via M365) and Mailchimp DKIM/SPF/DMARC DNS configuration.
- Transformed XD and Figma designs to pixel-perfect, production-ready frontends and managed full deployment lifecycle.
- Implemented and supported CRM platforms including Vtiger, Freshdesk, and HubSpot with custom workflows, automation, integrations, and customer support optimisation.

Software Engineer · [Bayview Technologies Inc.](#)

February 2020 – September 2020 | Makati City

- Built front-end logic for web applications using JavaScript ES6 within a Docker-based development environment.
- Developed web solutions using Drupal CMS and Slim Framework with object-oriented PHP practices.
- Followed standard Agile processes and managed staging/production deployments.

Senior Web Developer / Team Lead · [Digima Web Solutions Inc.](#)

June 2016 – January 2020 | Pandi, Bulacan

- Led development team to successfully deliver a custom Inventory Management System with basic accounting module, built with Laravel + AJAX.
- Served as project lead and client-facing point of contact, managing requirements and delivery for key accounts.
- Contributed as a part-time developer on a Multi-Level Marketing system built with AngularJS and Laravel.

PERSONAL & SIDE PROJECTS

QuoteFlowr — Quote-to-Invoice SaaS

- Built on Nuxt 3 + Firebase (Firestore, Auth, Storage) with Stripe/PayPal billing and Xero/QuickBooks integrations.
- Includes PDF export (jsPDF/html2canvas), transactional email via Resend, and deployment on Netlify.

Customised Sales, Purchase & Inventory System

April 2021 – September 2021

- Full-stack system with OctoberCMS backend (REST API) and Vue.js frontend. Sole developer from architecture to deployment.
